

GEOHERMAL RESIDENTIAL RATE RATE RGT

APPLICABILITY

1. For Services to any individually served family dwelling or unit (including the usual apartment buildings) devoted primarily to domestic, residential, household, and related services. Apartment units may not elect this rate unless each unit is separately metered.
2. Hotels, motels, boarding houses, dormitories, or other similar premises may not elect this rate.

CHARACTER OF SERVICES

Geothermal provided via water at a controlled temperature range, at a nominal range of 40 degrees F as a minimum and 70 degrees F as a maximum. Service shall be provided via supply / return valves.

RATE

Customer Charge:

Each service connection @ \$4.50 per month

Energy Charge:

Monthly based upon connected load @ \$26.73 per 12,000 BTU (Ton)

DISCOUNT FOR PROMPT PAYMENT

If customer pays bill in full within 14 days of the billing date, then the bill shall be reduced by 2.0%.

MINIMUM BILL

The minimum bill shall be the customer charge added to the energy charge.

TERMS

Services may not be terminated except by provider for a customer failure to pay promptly upon three (3) days notice by Municipal Services or under circumstances detailed in the Department's rules and regulations without advance notice.

RULES AND REGULATIONS

Service under this rate schedule is subject to the Department's rules and regulations, which are incorporated herein by this reference.

HOURS OF SERVICES

Twenty-four (24) hours per day year round, except for emergency or predictable shut down periods.

KIND OF SERVICE

Geothermal is distributed to the territory served through mains of sufficient size and in such locations as to supply customer's thermal requirements.

GEOHERMAL
SMALL COMMERCIAL SERVICE RATE
RATE SCGT

APPLICABILITY

1. For service to any commercial or industrial customer for geothermal energy when the entire requirements on the premises (exclusive of residential usages) are supplied at one delivery point through one supply/return valve assembly.
2. This rate is not applicable to emergency or standby service; however, seasonal service for commercial or industrial use may be taken under this rate provided the service remains connected throughout the year.

CHARACTER OF SERVICES

Geothermal provided via water at a controlled temperature range, at a nominal range of 40 degrees F as a minimum and 70 degrees F as a maximum. Service shall be provided via supply / return valves.

RATE

Customer Charge:

Each service connection @ \$15.30 per month

Energy Charge:

Monthly based upon connected load @ \$29.93 per 12,000 BTU (Ton)

DISCOUNT FOR PROMPT PAYMENT

If customer pays bill in full within 14 days of the billing date, then the bill shall be reduced by 2.0%.

MINIMUM BILL

The minimum bill shall be the customer charge added to the energy charge.

SPECIAL NOTE

The Department of Municipal Service reserves the right to make special determination of the minimum charge or special determination of an additional charge should equipment which creates high demands of momentary duration be included in the customer's installation or when the customer's service requirements or operating characteristics necessitate investments by the Department out of proportion to the revenues derived under this rate.

SEPARATE SERVICES

When customers receiving services at the effective date of this rate schedule have geothermal energy supplied through more than one meter, the bill for each meter will be calculated separately under the applicable rate schedule(s).
